White Wings® Ultra Laundry Detergent is a powdered, low foaming, balanced blend of ingredients that assures brighter, cleaner clothes. It is designed for laundry use in institutional and industrial automatic washing equipment.

White Wings contains additional polymers to keep soil in suspension and away from clean clothes.

Stearns developed White Wings to be an environmentally responsible product. Its concentrated detergent is premeasured and packaged in 100% biodegradable water-soluble film that dissolves completely in water. No need to measure, pour or cut open packages. When properly used, the ingredients of White Wings are broken down into simple compounds, which helps eliminate the suds and foam problems in our lakes and streams. It is also formulated to contain no phosphorus. Just add one water-soluble packet to your laundry for fresh, clean, and bright clothes.

White Wings easily rinses from fabrics. It contains no lye or strong caustic components. It can handle your toughest laundry problems.

Directions

Adjust water temperature, based on type of fabric. For white and colorfast fabrics, use hot water. For permanent press fabrics, use warm water. Best results are obtained with a cold water rinse.

 **STANDARD MACHINE:** Begin to fill washer with water. Add 1-2 packets of White Wings® Ultra Laundry Detergent. When using cold water, make sure the packet and powder are completely dissolved before adding clothes. Use one packet per 16-20 lbs. of laundry.

 **HIGH EFFICIENCY (HE) MACHINE:** Add one packet of White Wings® Ultra Laundry Detergent directly to the back of the drum. (Do not place in chemical dispensing unit.) Then, add clothes. Use one pack per 20-25 lbs. of laundry. Do not place the water-soluble packet directly on the clothes.

NOTE: This laundry detergent cleans all washable synthetics, colors, whites, cottons, and permanent press fabrics. Because of the heavy duty composition, it is not recommended for use on silks or woollens. This detergent has a concentrated cleaning strength to remove ground-in dirt, stains, and dulling gray.

Chemical Characteristics

Appearance	White Packets
Biodegradable	Yes
Corrosive Category (Concentrate).....	No
Corrosive Category (Use Dilution).....	No
DEA-Free	Yes
Fragrance	Lemon
Non-Acid	Yes
Non-Butyl	Yes
